| salsabilaa2285@gmail.com | www.linkedin.com/in/salsabilatech | <https://github.com/salsabl22>

Informatics Engineering student passionate about building intelligent digital solutions at the intersection of software engineering, artificial intelligence, and stock market. Experienced in developing full-stack web applications, NLP systems, and data-driven projects using React.js, Next.js, Laravel, Flask, Python, and machine learning technologies. Currently exploring AI-powered financial forecasting through deep learning and sentiment analysis, while seeking opportunities to contribute, learn, and create real-world impact through technology and stock market.

Projects

Pojok Religi - Multi Faith AI Knowledge Assistant

Flask, Groq API, Llama, Python

- Developed a multi-faith AI assistant capable of answering educational questions and providing contextual information across various religious topics.
- Integrated 2 AI technologies (Groq API and Llama models) to generate contextual and real-time responses.
- Implemented backend architecture using Flask for efficient API integration and request processing.

Gestura - Real Time Hand Sign Recognition System

Python, OpenCV, MediaPipe

- Developed a real-time computer vision system capable of recognizing 26 alphabet-based hand signs through webcam input.
- Implemented hand landmark detection and gesture classification to translate hand poses into corresponding letters.
- Applied OpenCV and MediaPipe to create an interactive sign language recognition experience.

Pixelated Receiptify - Spotify Analytics & Personalized Receipt Generator

Next.js, Tailwind CSS, Spotify Web API

- Developed a web application that transforms user's Spotify listening history into downloadable pixel-art receipts.
- Integrated Spotify Web API to analyze user profiles, top tracks, and favorite artists in real time.
- Designed responsive and interactive user interfaces with image export functionality for social sharing.

Indonesian Sentiment Analysis - Social Media Sentiment Analysis using IndoBERT and Sastrawi

Python, IndoBERT, Sastrawi, Pandas, Scikit-learn

- Built an NLP pipeline to classify sentiment from Indonesian social media datasets using IndoBERT.
- Performed preprocessing, tokenization, and model evaluation to improve sentiment classification performance.
- Processed and analyzed 510+ social media records using NLP and machine learning techniques.

Gemi AI - AI Powered Personal Finance Assistant

HTML, PHP, Tailwind CSS, Vite

- Developed an AI-powered chatbot that provides personalized financial recommendations based on user's spending history and financial inquiries.
- Contributed to the design and implementation of conversational features to support budgeting and financial decision-making.
- Collaborated in the development of a web-based personal finance management platform.

Education Level

Universitas Komputer Indonesia - Bandung

Sep 2023 - Aug 2027 (Expected)

Bachelor of Informatics Engineering, 3.45/4.00

- Participated in software development, technology-sharing, and data science activities.
- Developed AI-powered, web-based, and data-driven solutions through academic and personal projects.
- Applied machine learning, NLP, and computer vision techniques to real-world use cases.
- Explored AI applications in education, financial technology, and intelligent systems.

Organizational Experience

Codelabs UNIKOM - Bandung

Feb 2023 - Jan 2025

Member

- Participated in software development discussions and technology-sharing sessions.
- Represented the organization in data science and software-related for >5 international and nasional competitions.

Forum Generasi Berencana (GenRe) Kota Bandung
Staff of the Directorate of Program Planning and Development

- Coordinated organizational programs and monitored a 5-member team.
- Contributed to the development of human resource initiatives and evaluations.

Jan 2022 - Jan 2024

Election of GenRe Ambassador in 2023
Public Relations, Sponsorship, and Media Partner Division Staff

- Coordinated cross-functional teams, external partners, and stakeholders to support successful event execution and publication.
- Managed sponsorship and media partnership outreach, securing 15+ media partners through proposal preparation, professional communication, and collaboration

Jun 2023 - Sep 2023

Tech Stack

- Programming Languages:** Python, JavaScript, TypeScript, PHP
- Web Development:** React.js, Next.js, Tailwind CSS, HTML CSS, Flask
- AI and Data:** Machine Learning, Natural Language Processing (NLP), IndoBERT, Sastrawi, Pandas, Scikit-learn, OpenCV, MediaPipe
- Database and Tools:** MySQL, Azure SQL, MongoDB, Git, GitHub, Figma
